

The AccuMix-MT™ vortex mixer quickly and thoroughly blends highly-viscous formula components together using traditional tins.

AccuMix™ MT

The AccuMix-MT makes quick work of thoroughly blending formula components together to provide a tool-free means of mixing materials together. After your AccuBlend-HV doses the formula into a standard 5 or 10 pound (2.5 kg or 4.54 kg) metal tin, it is clamped into the AccuMix-MT. From there, about five minutes is all it takes to get ink that's ready to take to press.

Features

- Plate rings accept 5 or 10 pound tins (2.5 kg or 4.54 kg)
- Patent-pending orbital radial bearing system
- Secure clamping system
- Digital timer
- Variable speed

Ink Types:

All types of highly-viscous paste ink
Tin

Container:

10 pounds (4.54 kg)

Capacity:

Variable (100 - 1,750 rpm)

Speed Control:

About 8 minutes for a 5 pound batch (2.5 kg)

Mixing Speed:

18" (45.7 cm) W x 27" (68.5 cm)

Dimensions:

H x 14" (35.5 cm) D

Power Requirements:

120VAC, 60Hz, 8A

Shipping Weight:

Approximately 175 pounds (79 kg)
